EXPERIENCE

Graduate Teaching Assistant ***Jan 2026 - Present***

- Lead lab sections and discussion sessions for Embedded Systems & Programming Paradigms courses.
- Collaborate with professors to design lecture content and lab assignments.
- Guide students through hands-on exercises while providing real-time debugging support.

Database Editor – KU Physics and Astronomy Department ***July 2025 - Dec 2025***

- Automated course-substitution, grade-tracking, and reporting workflows using custom FileMaker Pro scripts.
- Reduced manual administrative effort by 30% through workflow automation.
- Maintained relational databases for 100+ graduate students, improving data accuracy.

KU IT Technician ***May 2024 - July 2025***

- Diagnosed and resolved 50+ weekly hardware, software, and Microsoft 365 tickets.
- Sustained a 95%+ resolution rate across TDX and ServiceNow platforms.
- Delivered accurate documentation with minimal escalations to leadership.

EDUCATION

University of Kansas ***Lawrence, KS***

Master's in Computer Science *Jan 2026 - May 2027*
Thesis track with specialization in Data Science and Engineering | **4.0 GPA**

Bachelor's in Computer Science & Cybersecurity Certification *Aug 2023 - Dec 2025*
Dean's Honor Roll – Spring 2025 & Fall 2025 | **3.67 GPA**

SKILLS

Skills	Data Engineering, Data Analytics, Backend Development, Machine Learning, Cloud Integration
Tech stack	Python, SQL, R, JavaScript, Bash, PyTorch, Scikit-learn, Pandas, NumPy, Apache Airflow, Kafka, Django, React, Node.js, Next.js, REST APIs, PostgreSQL, MongoDB, AWS, Docker, Git
Certifications	IBM Data Warehousing, Google Data Analytics Professional

PROJECTS

FirstResponseAI ***Hackathon Winner, Best Use of ElevenLabs***

- Built a voice-first incident command application for emergency responders with a Next.js frontend and FastAPI backend, using Gemini for AI-powered dispatch parsing and ElevenLabs for real-time voice synthesis across phone and operator views.

Cyclistic Ride Analysis ***Google Analytics Certification Project***

- Cleaned and analyzed 800,000+ ride records using PostgreSQL and Excel, then built SQL queries, R visualizations, and a Tableau dashboard comparing casual riders and members to support subscriber-conversion strategy.

Register Your Rep ***Personal Group Project***

- Developed a full-stack AI-powered fitness app that generates and tracks personalized workout plans, integrating the Google Gemini API for natural-language plan generation with a Next.js/React frontend and MongoDB backend, deployed on Vercel.
