Yadhunath Tharakeswaran

has successfully completed the online Specialization

BI Foundations with SQL, ETL and Data Warehousing

After completing this professional certificate, you be ready for an entry-level BI analyst role. You'll understand relational database concepts, can create cloud-based relational databases, execute SQL statements, and access databases using SQL and Python. You'll be able to create shell scripts with common Linux/UNIX commands, crucial for data preparation tasks. You can build batch and streaming ETL and ELT data pipelines using Bash, Apache Airflow, and Kafka. Additionally, you can design, model, and implement a data warehouse and analyze its data using BI tools like IBM Cognos, showcasing your business intelligence and related data engineering capabilities.

Rav Ahuja, Program
Director, IBM Skills
Network

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
